

XM radio is the best thing in modern technology around here since satellite TV, cell phones and the internet. We pay for all of these services. Rural America has been limited to a few AM/FM radio and local TV stations, poor cell phone signals, and snail mail for too long. We finally have access to the outside world of knowledge through modern technology and now, you want to take part of that away from us! What country is this anyway? I thought this was AMERICA. Land of opportunity & freedom. We understand how important or freedom is to us, now, after 911. Do we stand to loose more of our freedom and more of our opportunity from our own government? I think you take enough away from us already. Get a grip! Live in rural middle class America!! OPPOSE - HR #4026!!!
